

DIGITAL PRIVACY, SAFETY AND SECURITY

"It gave our team the means to move forward quickly, with guided categories that every school should address for compliance, community transparency, and implementation of well-structured procedures relating to student and staff privacy."

With the landscape of data privacy and digital safety becoming more expansive and complex each year, it is critical that we maintain awareness about the growing complexity of cyber security in the K-12 education space.

At RTG, our Digital Privacy, Safety & Security solutions aim to minimise vulnerability of your school's digital ecosystem and data. We work relentlessly to keep it that way, and have assisted many schools in formulating strategies and implementation plans for digital protection and cyber risk management.

Speak with the RTG team today to learn more about our suite of data privacy and digital safety solutions, and how we have assisted schools with designing and implementing best practice of cyber risk minimisation initiatives.
